

# ENUM WG report

# ENUM WG

- Chairs:
  - Patrik Fältström <paf@cisco.com>
  - Kim Davies <kim@centr.org>
- Charter
  - The ENUM Working Group discusses developments relating to Internet resource mapping using E.164 telephone numbers as identifiers, commonly known as ENUM. The working group monitors and promotes initiatives to advance this technology. It also identifies ways for the RIPE community to develop and nurture the use of ENUM.

# Current activities

- Keep a status page to identify and document the various ENUM projects being conducted in different countries
- Be a forum where status can be reported on ENUM deployment in various countries

# What happened?

- Walked through the questionnaire:
  - Differ between status during the trial and production phases
  - Dictionary is needed
  - Do only talk about ENUM, not *infrastructure ENUM*
    - Infrastructure ENUM might end up being a separate document later on, possibly focusing on what infrastructure ENUM really is
- Presentation from Sweden
- Presentation from UK

# What else?

- Niall O'Reilly offered helping with the webpage and to become a co-chair of the wg
