

ENUM request documentation

	Advantages	Disadvantages
ZIP file containing all documents	Less hits when searching, concept of a „single file per case“, easy maintenance: just put additional stuff in the ZIP file	Potentially large ZIP file to download for just a small piece of information
Separate files, all linked on a per-country basis	Good overview, well structured filing, concept we had already	Many hits when searching, potentially confusing – maybe still not <u>all</u> relevant documents returned
