# www.VIX.at

## The Vienna Internet eXchange

operated by the Vienna University
Computer Center / ACOnet

Christian.Panigl@UniVie.ac.at

RIPE51, 13.10.2005

# Current Status

- July 2005: changed VIXpeeringLAN prefix-length from /25 to /24 (please check !)

- Sept 2005: 86 members (9 doing IPv6 peering)

- Summary peaks @8.5 Gbps

- No incidents since RIPE50

# Future

- Currently running open Call for Proposals for new switch platform for VIX, aiming at:
  - Robust & scaling 10Gig++ platform to go with for 3-5 years
  - 10GbEth customer ports
  - better port security
  - better HW stability / resilience
- Plan to migrate within Q1/2006

# Considerations

- Making dual-10Gig connections very attractive

- Getting rid of 10Mb ports, slightly reduce prices for 100/1000 ports

- Easing connecting to VIX (allowing distance peering, allowing content providers)

# Questions ?
