

## Connecting the Unconnected

RIPE SEE 5 – 20 April 2016, Tirana

Maarit Palovirta ([palovirta@isoc.org](mailto:palovirta@isoc.org))

# The Internet Is for Everyone!

Percentage of individuals using the Internet

Source: ITU 2014

# Identifying the Right Strategy

1. **Availability: Access to Internet connectivity**
2. **Adoption: Use of the Internet**

# Availability of Internet Connectivity

## Internet Access Value Chain

# Accelerating Internet Development with IXP

- ISOC works with partners throughout the world to build IXPs, human capacity, and bottom-up governance of IXPs.

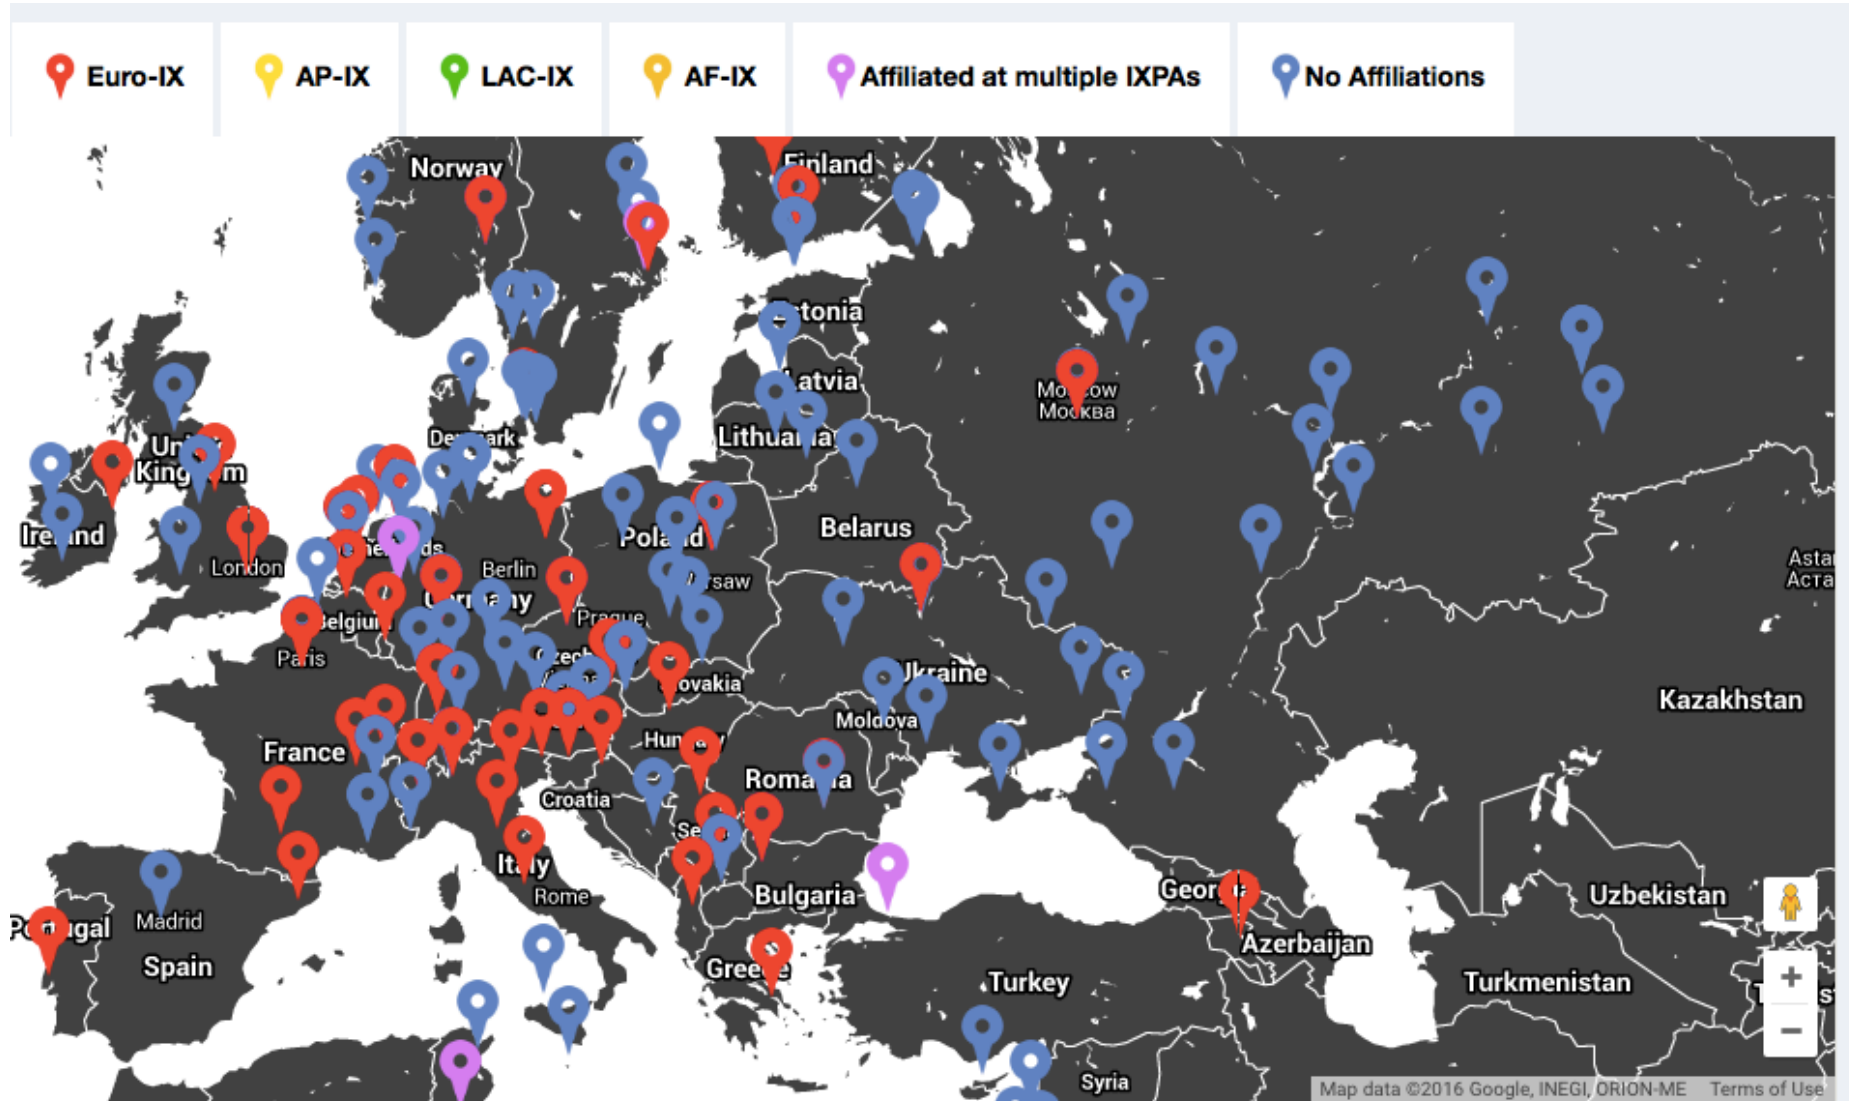

## ➤ With partners:

- ❖ Euro-IX, RIRs (RIPE-NCC, AfriNIC, APNIC, LACNIC), IXPs, Cisco, Comcast, Google, Alcatel, Microsoft, NSRC, PCH, and other global and regional experts.

## ➤ Through Grants:

- ❖ IXP Toolkit Grant from Google: [www.ixptoolkit.org](http://www.ixptoolkit.org).
- ❖ Alcatel and Cisco donations & equipment grants.
- ❖ Comcast and Microsoft grants for IXP development and training.

# EUR-IX: European IXP Landscape

# Kyrgyz Republic: IXP Work (2015)

- **IXP roundtable:** Business level introduction of IXPs to government, network operators and technical experts.

- **ISOC study on Kyrgyz Internet Environment:** Specific recommendations for next steps to the Kyrgyz Telecommunication Operators Association (who runs IXP)

- **BGP training:** Technical training on peering/ BGP to engineers from local ISPs.

- **Next steps:** Visit to a European IXP and further technical training (tbc!)

# Georgia: IXP Workshop (2014)

- **Workshop partners:** GNCC, RIPE NCC and EUR-IX.
- **Attendees:** Main telecoms operators, ISPs, data center providers, GRENA.
- Summary of **issues raised**:
  - IXP and competition in telecoms market;
  - Private peering vs. public peering;
  - IXP neutrality: who and where;
  - Value add of IXPs;
  - Role of government in IXP development.

The screenshot displays the Internet Society website's 'Events' section. The top navigation bar includes links for Home, Connect Login, Become a Member, Find a Chapter, Blog, News, and a language selector. The main navigation menu features 'Who We Are', 'What We Do', 'Events' (highlighted), 'Publications', 'The Internet', and 'Get Involved'. The left sidebar lists various events: AfPIF, Internet Events Calendar, Chapter Events, Talks and Appearances, INET Conferences, IETF Meetings, Internet Governance Forum, ION, NDSS Symposium, Asia Internet Symposium, Workshops (expanded to show IXP Workshops, IXP Workshop Serbia, AXIS Workshops, Workshop Centre, and ccTLD Workshop), and more. The main content area is titled 'IXP Workshops' and features the Internet Society logo and the text 'IXP Workshop'. It describes the organization's mission to foster robust, efficient, and cost-effective interconnection and traffic exchange environments, including assisting the development of IXPs. It also mentions a series of IXP Workshops created for IXP Managers and Operators, Internet Service Providers, Network Operators, and National Research and Education Networks. A link to the next workshop, 'IXP Workshop - Belgrade, Serbia, December 4-5', is provided. At the bottom, a link is provided for more details on Internet Exchange Points (IXPs): <http://www.internetsociety.org/what-we-do/issues/internet-exchange-points-ixps>.

# IXP & Interconnection Activities

## IXP Work in Europe & CIS

- Support of CEE Peering Day & RIPE SEE
- **IXP workshops in SEE:**
  - ✧ Montenegro | with RIPE-NCC, France-IX, NIX.CZ, INEX, Cisco, ICANN in 2015.
  - ✧ Serbia | with partners in 2013.
  - ✧ Georgia, Kyrgyz Republic and Tajikistan | in 2015.
- **Equipment donations:**
  - ✧ Serbia in 2014, Macedonia and Montenegro likely this year.

# Last Mile Connectivity: Wireless For Communities (W4C)

## Objectives:

- Advance **citizen empowerment, local economic development, and education** through Internet access.
- Create new opportunities for **skilled jobs and entrepreneurship** through IT training.
- Ensure **sustainability** of the project through solid business model and train-the-trainer programme.

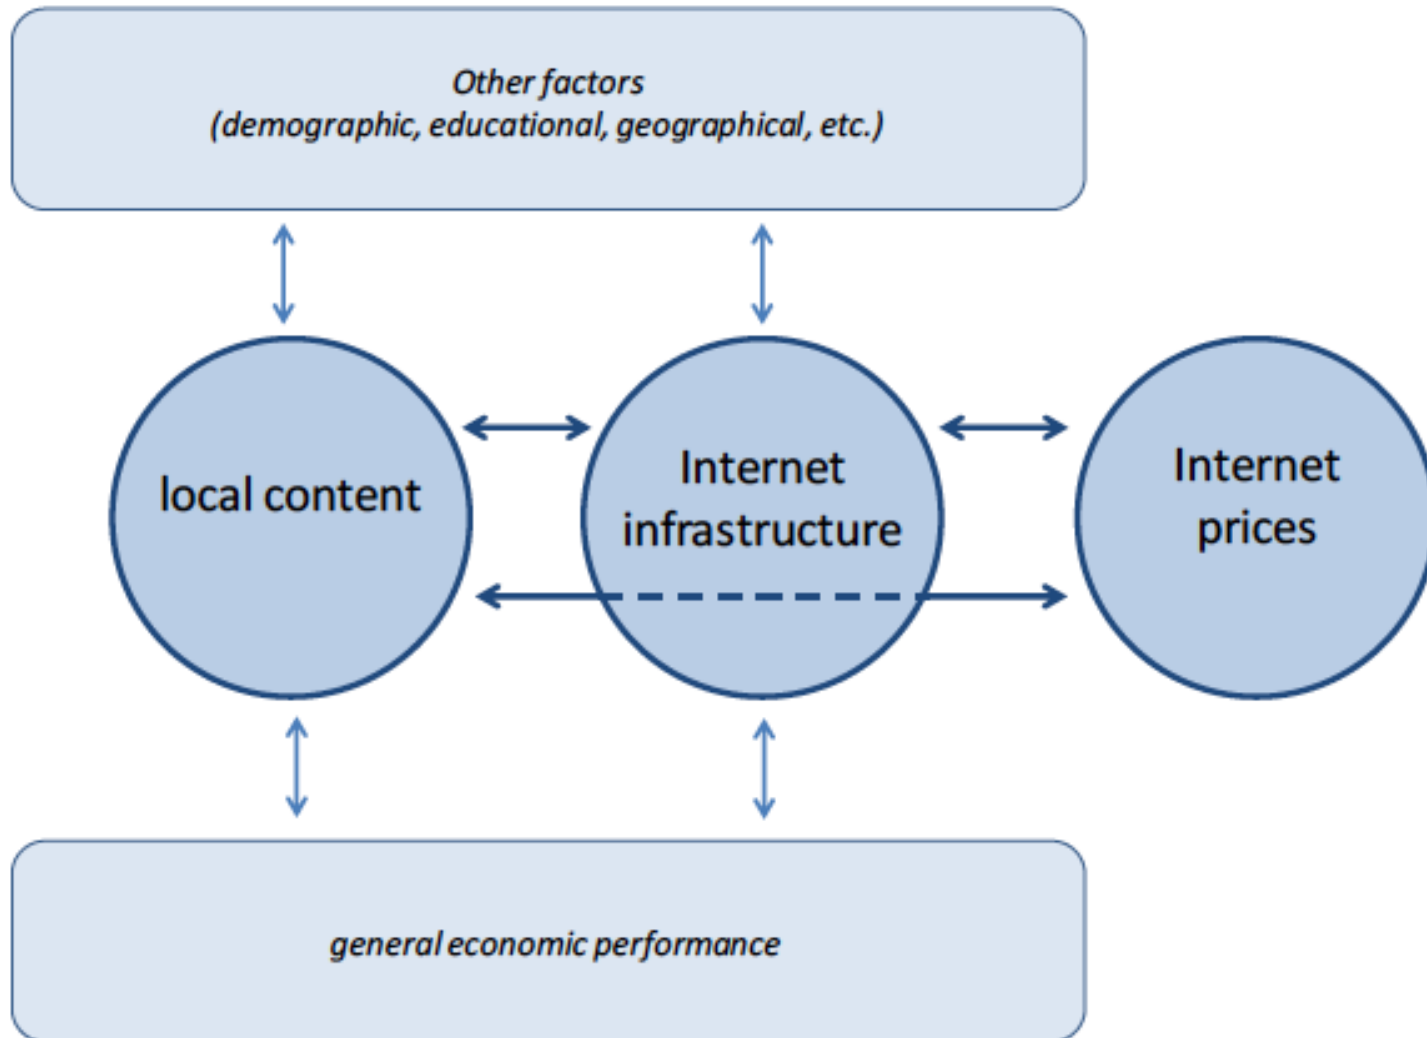

## Results in India:

- ❖ **Access:** 22,000 people in rural villages connected, with total network coverage radius spanning some 140 kilometers.
- ❖ **Public access points:** Information kiosks and rural cyber cafes.
- ❖ **E-governance initiatives:** Community service centres, automation of birth and death certifications, and single window clearance systems.

# Internet Adoption: Local Content

# Language is a significant issue, and English remains over-represented

**Figure 4.13: Proportion of Internet users, websites and native language speakers for the top-ten Internet user languages**

[Source: internetworldstats.com, W3Techs, 2014]

# Creating Local Content

Number of ccTLD domains (in millions)

Source: ISOC Global Internet Maps (2015)

# Developing Technical Capacity and Skills

## Knowledge Transfer

### Deploy 360 programme:

- Internet Protocol version 6 (IPv6);
- Domain Name Security (DNSSEC);
- Securing border Gateway Protocol (BGP).
- Transport Layer Security (TLS) for applications.

## Policy awareness

### E-learning courses:

- Shaping the Internet: Internet Governance and current policy topics;
- Digital footprint;
- Managing your online identity.
